

Public Street and Protective Lighting Rate

GLACIER ELECTRIC COOPERATIVE, INC.
BOX 2090, CUT BANK, MONTANA 59427

EFFECTIVE: October 1, 2011

RATE - Public Street and Protective Lighting

AVAILABILITY:

Public street and protective lighting is available to all customers in all classes. The rates set out below are to be paid in addition to the consumer's regular billing under the applicable rate for electric usage.

RATE - Per Light:

	Per Month	Per Year
Less than 200 Watt	\$11.00	\$132.00
200 Watt and higher	\$12.00	\$144.00

The above rates include the electricity used by the unit and installed on an existing consumer pole for protective lighting.

New Security Light Installation:

The member will pay a flat fee for the installation of a security light according to the following schedule:

New Light, installed on existing pole	\$150.00
New Light, new pole and overhead service	\$350.00

The above costs will apply to installations within 150 feet of the Cooperative's existing transformer or existing secondary wires. Members desiring security lights requiring an additional transformer or at a greater distance will bear all of the additional installation cost.

Charges for lights shall be submitted on the member's regular electric power bill and shall be due upon presentation, except as provided in individual contracts where an annual charge may be made, payable in advance such as in a street lighting district.
